Code of Practice

WSA 11—2012

First Edition

Version 1.1

ACKNOWLEDGMENTS

The Water Services Association of Australia (WSAA) Board would like to express its appreciation to WSAA Members, Associates and staff for their contributions to the creation of the first edition of the Code. Contributions from other industry organisations and individuals are also gratefully acknowledged. In particular the following contributors deserve special mention for their productive work and commitment to the development of this Code:

Mirko Sramek	Sydney Water	Lawrie McGing	South Australian Water
Thomas Tyrrell	ActewAGL	Geraldine Campbell	South East Water
Henry Freise	Barwon Water	Tom Sculthorpe	Southern Water
Ian McKensey	Hunter Water	Igor Jungic	Queensland Urban Utilities
Fred Khalil	Sydney Water	Dean Anderson	Yarra Valley Water
Tony Borrromei	Water Corporation	Alex Winchester	National Measurement Institute

DISCLAIMER

WSAA Codes are published by Water Services Association of Australia Limited on the understanding that:

- Water Services Association of Australia Limited and individual contributors are not responsible for the results of any action taken on the basis of information in the Water Supply Code of Australia, nor any errors or omissions.
- Water Services Association of Australia Limited and individual contributors disclaim all and any liability to any person in respect of anything, and the consequences of anything, done or omitted to be done by a person in reliance upon the whole or any part of the Water Supply Code of Australia.

PREFACE

The National Framework for Urban Water Metering refers extensively to a Metering Code of Practice, which will comprise a series of Codes that address various aspects of metering. These codes underpin the implementation of the National Framework and ensure a nationally consistent approach to the key areas of responsibility of urban water metering. The National Framework for Urban Water Metering defines **why** the urban water industry should meter the supply and consumption of water. The codes of practice define **what** needs to be addressed in each of the key urban water areas of responsibility. The method of **how** each Code is applied in practice is determined by the policies and processes of the individual water service providers.

This document is the Compliance Testing of In-Service Water Meters Code of Practice.

Whilst the framework and associated Codes of Practice are voluntary, the adoption is strongly encouraged to facilitate consistency of urban water metering practices in Australia.
